

Glass Box Visibility (GBV)

From data silos to real-time insight

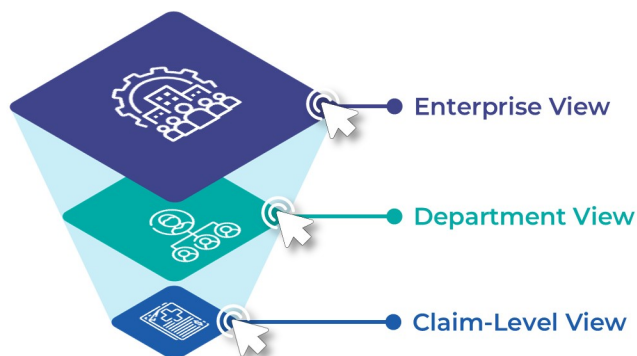

Hospitals and Health Systems are drowning in data but starved for insight. Despite investments in EMRs, RCM systems, and contract management tools, visibility remains limited.

- Reports and dashboards provide fragmented snapshots, not the full story.
- Data remains scattered across spreadsheets and silos.
- Leaders struggle to make confident decisions on initial denials, final denials, overturns, recoups, payer yields, underpayments, and performance.

Data exists everywhere—but actionable visibility is nowhere.

Bloom's Glass Box Visibility (GBV)

Bloom's Glass Box Visibility brings complete transparency and control to hospital financial operations. It unifies data across systems, departments, and payers—so you can see clearly, act faster, and decide smarter.

Key Features

Enterprise-Wide Single Source of Truth

Integrates EMR, RCM, contract, and payment data into one consistent platform.

Customizable Metrics & Rules

Department-level configurations align analytics with operational goals.

3 Clicks to Action

Move seamlessly from system-wide trends to specific claims in seconds.

Comprehensive Payment Visibility

Track total payments, service line yields, inpatient/outpatient splits, and claim-level outcomes.

Persona-Based Dashboards

Tailored for CFOs and leaders of RCM, payer contracting, and clinical operations.

Drill-Throughs & Root Cause Analysis

Identify “why” behind denials, underpayments, or performance variances.

Benefits

True Transparency

End-to-end visibility across the revenue cycle, from claims to collections.

Revenue Recovery

Surface hidden underpayments and missed opportunities.

Operational Confidence

Replace manual reporting with defensible, trusted insights.

Accelerated Decisions

Insights in three clicks—no data wrangling, no waiting.

Stronger Negotiations

Arm payer contracting teams with clear, data-backed intelligence.

Why Bloom

Healthcare Data Expertise

Built for hospitals and RCM leaders who demand clarity from complexity.

Proven AI & Analytics Leadership

Led by experts with decades of experience in clinical, operational, and financial data systems.

Integrated & Scalable Platform

Works seamlessly across EMR, contract, and payment ecosystems.

6 Weeks to Value, 3 Clicks to Action

Deploy in weeks, act in clicks, and measure ROI quickly.

The GBV is a part of Bloom's iPAM solution

Dynamic Payer Profiling

Post Bill Denials: Builds predictive models of payer behavior.

Glass Box Visibility

Get full visibility and insights into claims and denials.

Proactive Denials Avoidance

Pre-Bill: Analyze encounter and claim details to reduce the likelihood of denial.

Accounts Receivables Insights

Analyze AR and grade accounts for prioritized action, write-off, and outsource.

Denials / RCM Automation

Automate downloads & uploads of information and use AI to automatically integrate, analyze and respond to payers.

Denials Appeals Agent

Post Bill Denials: AI Agents automatically analyze and create appeals.
