

Intelligent Risk Adjustment Service (iRAS)

AI-Driven RAF Optimization for Medicare Advantage

Risk adjustment is critical for Medicare Advantage, shaping reimbursement and compliance. Overstated RAF scores invite penalties and audits, while understated scores lead to revenue loss and underfunded care. Traditional risk adjustment methods are manual, slow, and error prone.

Bloom Value's iRAS leverages AI to optimize RAF scores, ensure compliance, improve Star Ratings, and drive efficiency.

Key Features

AI-Powered Risk Adjustment

- Leverages GenAI, NLP, and LLMs to improve risk adjustment accuracy
- Reduces coding discrepancies to optimize RAF scores

Chronic Disease Detection & Provider Insights

- Identifies undocumented chronic conditions
- Delivers provider-specific insights to boost risk capture and Star Ratings

Provider App for Real-Time Guidance

- Provides real-time insights for accurate documentation
- Integrates with EMRs for seamless workflows
- Flags missing conditions and documentation gaps

Audit Support

- Streamlines review of medical records, EMR data, and claims
- Centralizes data analysis and expert collaboration for auditors

Reports & Analytics

- Creates customizable reports on encounter history, provider impact, and Star Ratings
- Delivers insights for audit readiness and risk evaluation

Advanced Data Handling

- Analyzes structured and unstructured data using AI
- Integrates with historical data, EMRs, and claims for seamless utilization

Benefits

Boost Accuracy & Compliance

- Reduces coding errors and enhances risk score integrity
- Maintains audit readiness with structured and transparent documentation

Increase Efficiency & Reduce Administrative Burden

- Automates manual risk coding to improve coder productivity and accuracy

Real-time AI assistance to cut down on administrative burden

Improve Care Quality & Star Ratings

- Enhances member insights to support proactive care management
- Enables proactive interventions that contribute to higher Star Ratings and better patient outcomes

Maximize Financial Performance

- Optimizes RAF scores to ensure fair reimbursement
- Enhances financial sustainability by reducing revenue leakage
